Introduction to Life

A five day Workshop
By Medha Jananam.

Feb 15th – 19th
9:00am to 5:00pm

Bengaluru, India.

Medha Jananam cordially invites you to join the 'Introduction to Life' workshop.
Come with your deep, nagging and puzzling questions about life.
Learn new and unique concepts that you do not find elsewhere.
Have open, deep, fun, vibrant and engaging discussions.
Leave with answers that will transform your life.

Addresses many questions about life

Professional life: How to recognize various types of bosses and colleagues at the workplace? How to work with them? What stops us from becoming successful? How do I know what is the right career path for me? Should I put the career first or family first? How to get ahead in this competitive world? What are different types of customers and how to market to them?
Personal life: How to raise children successfully? How to understand women? How to understand men? What exactly is the meaning of marriage? How to deal with extended relationships that come along with marriage? What is the meaning of happiness? Why are some people so tough to deal with? How much should I care or not care about friendships? How to teach values to children ?
Spiritual life: Why are there so many religions? Why people, even in my own family, differ so much in their spiritual attitudes and preferences? What is the meaning of self-realization? What is the meaning of our short life in the universe that is billions of years old? Does science have the right answers or does spirituality? Why are there rituals in every culture and what is their significance? Why most of the universe is lifeless?
Moral life: Why do evil people get ahead of good people in life? Is there any such thing as absolute truth? Is there a universal definition of justice? Are politicians a different breed, or just ambitious and corrupt people? Are moral values on the decline?
Social life: Are rationalists any more open than religious people ? Why are some people so clean and others are not? Why are people short-sighted? Why are some people so good at managing money while others are so bad at it? Are the modern times better or the ancient times better? What are the differences between East and West ? Is globalization good? Can we stop global warming? Why do siblings who grow up in the same environment often turn out to be different? Why are some people interested in sports while others are interested in politics?

Based on 7 unique concepts

Medha Jananam developed seven unique concepts to answer many questions about life: **Organisms, Fractals, Cycles, Colors, Layers, Balance and Growth.** They are based on several branches of modern sciences such as biology, psychology, sociology, anthropology, economics, philosophy, cosmology, quantum physics and mathematics. They also draw from several concepts of classical wisdom of India, such as Pancha Kosa, Chaturvarna, Aum (the opposite of zero), Vibhuti, Tat, Sat, Chit, Pancha Bhoota, Triguna, Triruna , Ashramas, Purusha/prakriti and Purshardhas.

Informal and open environment

This workshop is full of informal, open and vibrant discussions. People share personal stories and interpret the concepts in their respective life situations and learn from each other.

Open for all

Open for people of all backgrounds - Professionals, Managers, Leaders, Business people, Housewives, Students and all others who are interested in understanding life in depth and increasing happiness all around them.
Minimum age: 25.
