Happiness in life and marriage and Success in career or business or in spiritual growth

Do not come for free.

The colored concentric circles depict the five layers that represent everything inside of you and the three layers that represent everything around you.

Medha jananam workshops help you understand the meaning and significance of the eight layers.

That understanding puts you miles ahead of yourself on the road to happiness and success at home as well as outside.

You need several ingredients like education, money, health, hard work, humility, intelligence, empathy, confidence, experience and so on.

But, all of these ingredients fall apart and even work against you unless you have a healthy amount of the

Key ingredient.

That key ingredient is your very own '**View of Life**'.

Stagnated or shrunken, it pushes life into a downward spiral and leaves you at the mercy of circumstances.

Broadened and deepened, It binds all those ingredients together and lays in front of you many roads and pathways to success and happiness in calm weather as well as storm weather.

Medha Jananam workshops take you through a phenomenal journey into yourself and around the world you live in to broaden and deepen your '**view of life**',

The workshops are like field trips, with lots of fun and stories and theories and conversations along the way.

The trips start once every month, here at NCSU.
Join many others like you and unlike you.
Grow five years worth, in less than five days!
