Ph.D

Engaged only one part of my brain, but

Medha Jananam*

Touched many parts of my ~~brain~~ life.

It helped me see the big picture of life,
and understand myself, the society and the universe much better.
I gained deep insights into the connections between
career and goals, survival and ideals, family and society, science and spirituality.

If you are also a grad student like me, give me a call.
We can have coffee and
I can share with you the details of what I have learned.
