Ph.D

engaged only one part of my brain, but

Medha Jananam*

touched many parts of my ~~brain~~ life.

It helped me see the big picture of life,
and understand myself, the society and the universe much better.
I gained deep insights into the connections between
career and goals, survival and ideals, family and society, science and spirituality.

If you are also a grad student like me, give a call.
I would love to share my experience before and after Medha Jananam.
